

Gyre Garden

Hello, and welcome to the Gyre garden! This rooftop garden is meant to be a people space for the church's congregation and their guests. A lively garden full of interesting colors, textures, smells, and tastes, this garden stimulates more than just your eyes! The Gyre garden offers its users an array of culinary herbs and unique yellow raspberries. The design also houses two bee boxes and a shadow arbor patio with pertinent scripture that offers the site some learning value and whimsy. Privacy is provided with a trellised wall of flowering vines that are evergreen, creating year round sanctuary. Overall the garden is meant to function as an exploratory outdoor room of sorts, creating the opportunity for meditation, reflection, gathering, and sharing.

PLANT LIST AND SEASONALITY CHART

Scientific Name	Common Name	Install Size/Type	Mature Size	Q (lb)	SPR	SUM	FALL	WIN	Maintenance Notes
Allium schoenoprasum	Chives	NA	1-2' T x 1' W	67					Trim plants back to 1-2" monthly to encourage flush growth.
Gesnerium sempervirens	Carolina jasmine	4" pot	12-20' T x 3-6' W	30					Prune immediately after flowering. Must be trellised.
Loropetalum chinense 'Monreal'	Raspberry fringe flower	quart	4-6' T x 4-6' W	18					Lightly prune in the spring when flowering has finished.
Salvia officinalis	Berggarten sage	3" pot	2-3' T x 2-3' W	42					May be trimmed back to newly emerging growth or strong stems in spring.
Salvia montana	Winter savory	3" pot	1-2' T x 1-2' W	37					Older plants tend to get woody, so keep them pruned out to encourage new growth.
Rosmarinus officinalis 'Joyce DeBaggio'	Golden rain rosemary	3" pot	3-4' T x 2-3' W	50					Prune and shape as needed.
Rubus occidentalis 'Anne'	Anne raspberry or yellow raspberry	quart	4-5' T x 4-5' W	17					Berries should be picked July-Sept. Prune and thin in late winter/early spring.

INSTALLATION NOTES: The site can be broken up into 3 stages to be completed on a year to year basis dependent on time and funding.

Stage 1 - would consist of prepping the site, moving the chives to their noted location or a temporary spot out of the way, putting in railing along edge, establishing the trellis wall, and planting the Carolina jasmine.

Stage 2 - would consist of creating new entry points into site, building the shadow arbor patio, and planting the shrubs and herbs, and finalizing the placement of the chives if not already done.

Stage 3 - would consist of defining paths, establishing bee boxes, and creating seating/planters outside of main roof garden (if desirable).
